WORK EXPERIENCE

FREELANCE WEB DEVELOPER

Upwork

06/2020 - 12/2021

Achievements/Tasks

- Built an api to check the product availability for delivery at their pincode.
- Fix the bug.
- Built a to-do app for client by using mongoose & express.

Founding Member & Backend Engineer Liquide Solutions Private Limited

01/2022 - 06/2022

Bengaluru

Liquide is a wealth tech-startup whose aim is to make investing simple.

Achievements/Tasks

- Built an investing app from scratch.
- Integrated api to place order,fetch portfolio,send notifications and sms and integrate razorpay for payment.
- Migrated data from one database to other.
- Scraped data through url and parsed data from rss-feed.
- Optimise the performance of app because of so many real-time data on app.
- Made a search engine for searching stocks on app.

PERSONAL PROJECTS

Shopit- An ecommerce webapp

- Built using MERN stack.
- It is just like amazon app where you can search for products,add the products to cart and buy the products.
- I have used Json web token to authenticate the page & mongoose to create the models for user,products and orders.
- Used SMTP to send mail to users.

Live chat App

- This app is built using socket.io,jquery.
- It can be used to communicate between multiusers in a room.
- In this app I developed an interface where you can join a particular room and chat.
- I also included some functionality like automatic scrolling for better user interface.
